Professional Profile

Seasoned Product Manager with a strong background in mobile and web products. Proficient in guiding diverse teams, crafting strategic roadmaps, and optimizing user experiences. Always on the lookout to leverage AI innovations that can drive transformative results and unlock efficiencies. Proven track record of leading projects from inception to successful launch, prioritizing excellence, innovation, and efficiency at every stage.

Career Summary

Assistant Vice President - Product, HSBC

Aug 2025 – Present

KEY RESPONSIBILITIES

- Leading the development of **Data Visa**, a centralized cross-border data access request platform that enables application owners globally to securely request and approve cross-border data access.
- Driving **extensive product discovery** by collaborating with Application Owners and Legal SMEs to design the future-state centralized access ecosystem.
- Defining the long-term product vision, establishing strategic roadmaps, and designing high-impact MVPs** in close collaboration with Application Owners and Legal SMEs.
- Driving AI initiatives** to minimize request submission times and expedite the approval pipeline.
- Leading cross-functional Agile squads by authoring high-level Jira features, **mentoring Business Analysts** on User Story grooming, conducting Product demos, and strategically supporting core scrum rituals.

Senior Digital Product Manager, Wells Fargo

Apr 2024 – Aug 2025

KEY RESPONSIBILITIES

- Spearheading the development of a **B2C onboarding platform**, "Onboarding as a Service," designed to streamline the onboarding for our Commercial Banking & Corporate Investment Banking customers.
- Leading the **end-to-end product lifecycle**, including defining and **prioritizing capabilities** by collaborating with business stakeholders to determine specifications and requirements.
- Exploring AI use cases** to improve efficiency and reduce human interference in the onboarding process.
- Expanded platform functionality **by delivering two critical features**: 'Case Withdrawal' for instant onboarding cancellation and a B2C 'Request for Information' module to gather targeted customer data.

Product Manager, Capgemini Invent | ServiceLink

Apr 2022 – Mar 2024

KEY RESPONSIBILITIES

DESIGNATION: MANAGER

- Own the long-term **product roadmap** and **product vision** for ServiceLink's **Mortgage Processing SaaS product**.
- Lead a cross functional team of 1 UX, 7 Dev, and 3 QA resources to drive the delivery of a **product backlog** across the entire **product lifecycle** by gathering requirements from all levels of stakeholders, including **UI/UX, customer journey mapping, and product design**.
- Initiate discussions with the Product team, Engineering team, and Tech Leads to coordinate **release planning, MVP planning** and host **Scrum of Scrums**.

PRODUCT METRICS ACHIEVED

- Reduced average turnaround times** for all orders from origination till disbursement from 6 days to 4 days.
- Improved NPS scores** given by lenders from +16 to +43 in the first 3 months of its introduction.

KEY RESPONSIBILITIES

DESIGNATION: SENIOR CONSULTANT

- Support the product discovery for HSBC's mobile banking app using competitor analysis and focused interviews, to define the **product roadmap** and **product vision** to develop **card control features** for the bank's customers.
- Successfully launched four journeys: Temporarily block/unblock a card, set travel plan, and set a monthly spend limit for the UAE market; report damaged card or stolen card for the UK market.

PRODUCT METRICS ACHIEVED

- 46% **adoption rate** for monthly spend limit. 18% eligible users utilized the temporarily block/unblock card feature at least once, and 8% eligible users utilized the set travel plan feature at least once post 30 days of introduction.
- 55% **reduction in calls to customer care** hotlines to report a lost card or damaged card post 30 days of introduction.
- **Increased NPS score** specifically for the app from -12 to +16.

 Product Owner, Capgemini | Morgan Stanley

Jun 2017 – Dec 2019

KEY RESPONSIBILITIES

DESIGNATION: CONSULTANT

- Built a GDPR-compliant Data Transfer tool that helps Developers and QAs securely move Production data to Dev and QA environments while automatically identifying and masking sensitive Customer & Financial data.

PRODUCT METRICS ACHIEVED

- Achieved a 78% positive satisfaction score from internal users regarding the modernized UI and enhanced feature set within the first 60 days post-launch.
- 91% of application owners reported that the synthetic test data generated post-masking "met or exceeded expectations" for their development and testing needs.

Education

 **Post Graduate Diploma in Management**
Institute for Financial Management and Research, Chennai

2015 - 2017

 **Bachelors in Business Administration**
Brihan Maharashtra College of Commerce, Pune

2011 - 2014
